Most Contributing Airports in Countries Air Traffic

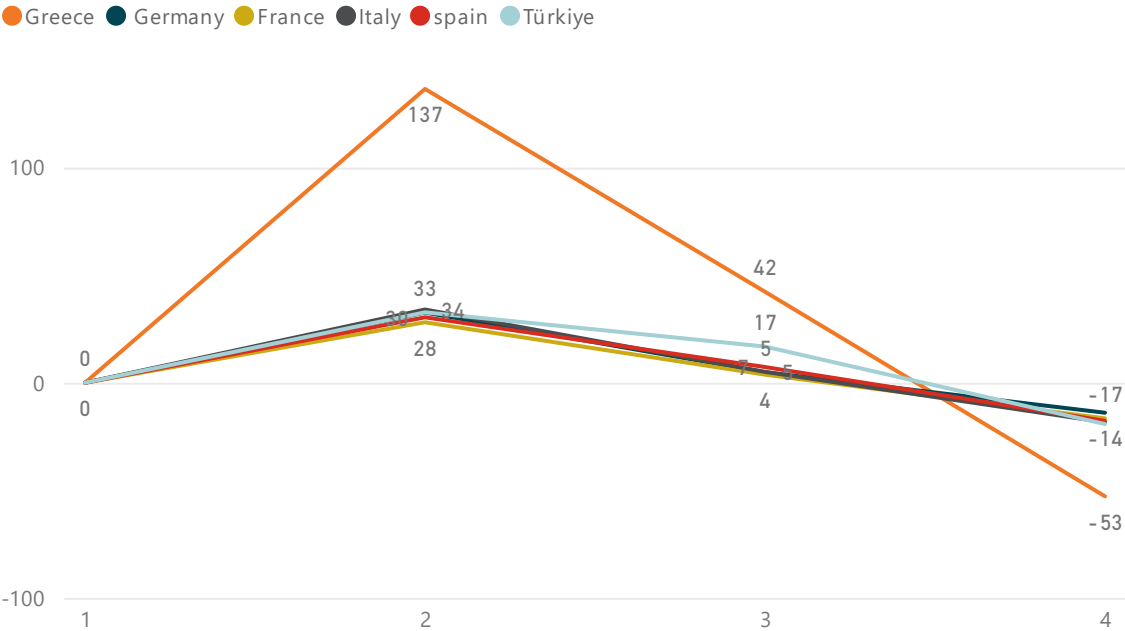

Top 10 Airports by Total Traffic

Key Insights:

- Spain recorded the highest total air traffic among European countries, while Istanbul Airport ranked first by overall airport traffic.
- Amsterdam Schiphol handled over 91% of its country's traffic, indicating a very high reliance on a single airport.
- Countries vary not only in total traffic but also in how that traffic is distributed across their airport networks.
- Germany's airports recorded the highest average traffic per airport among the analyzed European countries.
- Despite recording the highest total air traffic (2.4M flights), Spain's average traffic per airport was lower than several other leading European countries, indicating a more distributed airport network.

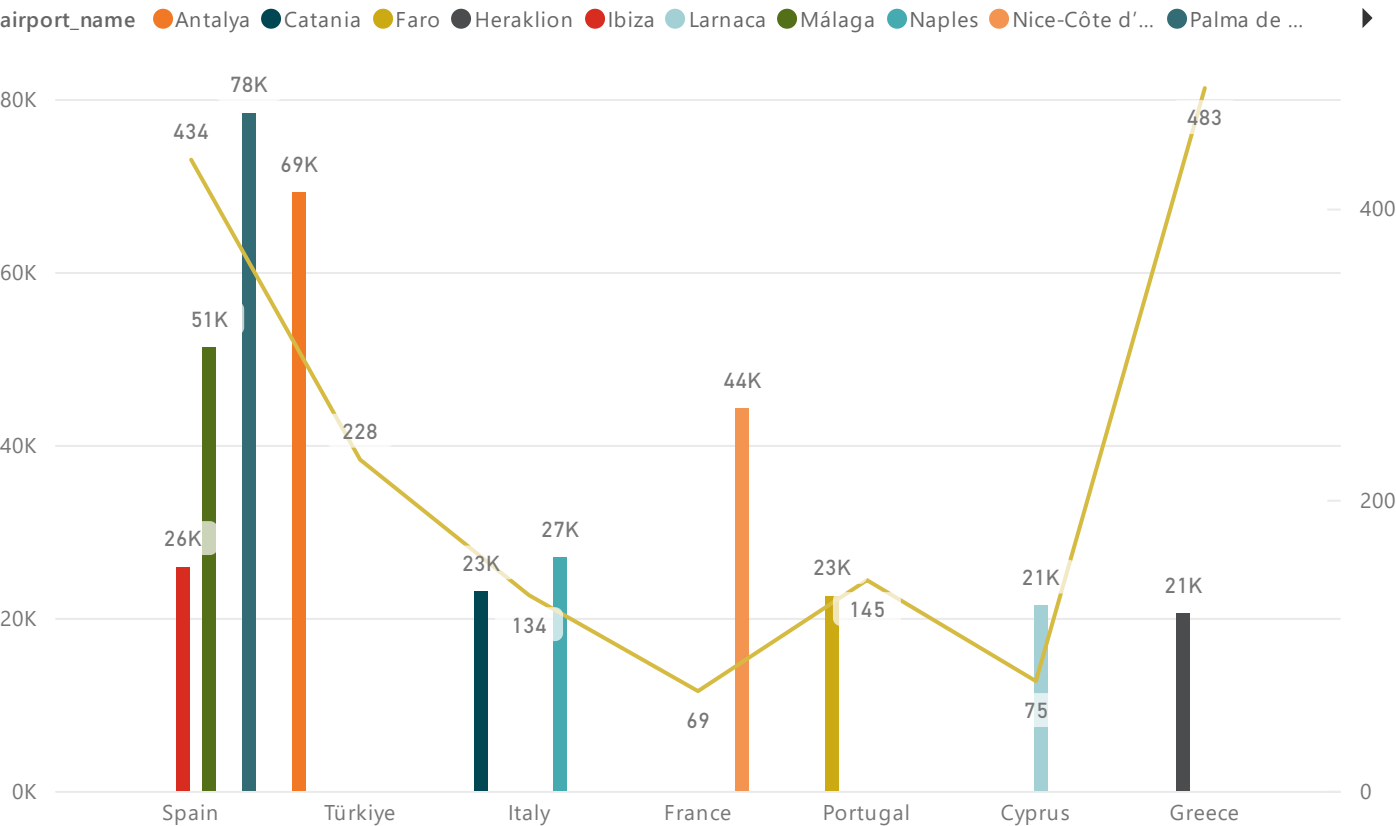

Quarter-over-Quarter Growth by Country (%)

Key Insights:

- Greece experienced the strongest seasonal surge, recording +137% growth in Q2 before declining by 53% in Q4.
- Spain maintained the highest monthly traffic throughout the year, indicating consistently strong air travel demand.
- Most countries reached peak traffic during the summer months, highlighting the importance of the seasonal travel period.
- Antalya, Catania and Faro were among the airports contributing most to the seasonal increase in air traffic.
